

Hilton Chicago/Indian Lakes Resort

Lighting Retrofit Case Study

Customer:	Hilton Chicago
Facility Type:	Resort
Annual Energy Savings:	60%
Payback Period:	1.38 years

The Company

The Hilton Chicago/Indian Lakes Resort is Chicago's premier golf and spa destination offering the perfect county-style escape. Located on 225 acres, guests enjoy exclusive golf courses, award-winning spa services, fabulous dining and 50,000 square feet of event space.

Hilton Chicago/Indian Lakes Resort recently underwent a \$20 million redesign and renovation helping to bring their visitors an even more enjoyable and unforgettable stay

The Challenges

Hilton Chicago/Indian Lakes Resort selected National Retrofitting Group to oversee their entire lighting retrofit initiative.

Installation was completed around Hilton Chicago's schedule of guest events and activities.

Hilton Chicago/Indian Lakes took advantage of NRG's innovative financing option through Extended Terms America. Post-retrofit cost savings helped offset extended payments options.

The Results

National Retrofitting Group retrofitted over 2,000 inefficient fixtures throughout the resort. A cost saving measure that will reduce lighting based energy usage by more than 60%.

All visitors to Hilton Chicago/Indian Lakes Resort will notice the upgraded look and feel from the new lighting throughout the resort.
